Monitoring the Future is an annual survey of 8th, 10th, and 12th graders conducted by researchers at the Institute for Social Research at the University of Michigan, Ann Arbor, under a grant from the National Institute on Drug Abuse, part of the National Institutes of Health. Since 1975, the survey has measured how teens report their drug, alcohol, and cigarette use and related attitudes in 12th graders nationwide; 8th and 10th graders were added to the survey in 1991.

42,531 students from 396 public and private schools participated in the 2019 survey.

Teen vaping more than doubles in past two years.*

Illlicit drug use

Daily marijuana use in lower grades increases but past year marijuana use steady

Prescription drug misuse continues decline from peak years

Tobacco and nicotine: Vaping threatens progress

Alcohol use continues its decline
